

Long Course Route Change

Caution is advised on County Road E to reduce risk of pinch flats and possible crashing. Bikers have reported this problem and we are limited in our ability to change the course to avoid E completely. We are able to divert from E onto Spencer Lake Road then turn left on East Road and rejoin the original course at Crystal Lake Road. This misses the worst part of Co Road E and also of Crystal Lake Road. We will have the repair vehicle stationed on the Section of E that we have to use. It was suggested that the far right side of the road was less rough. We did check all alternate routes, temporary repair, etc and this is best we can do. We found out that Co. E has been scheduled for replacement for two years but there no funds available at this time. Please take caution to reduce your risk of flats and injury.
